

ISO 27001, ISO 9001, ISO 14001 LEAD AUDITOR & LEAD IMPLEMENTER COURSES

Provided by Advisera and local training partners

TRAINING PARTNER

ARCA-Consult GmbH

Simple way to become certified ISO 27001, ISO 9001 or ISO 14001 auditor or implementer

Innovative courses from Advisera are the perfect combination of online and class- room training. Designed for beginners in the auditing and implementation of ISO standards, these courses are perfect for everyone who wants to start their career as a Lead Auditor or Lead Implementer for ISO 27001, ISO 9001 or ISO 14001. No prior knowledge is needed to take this course.

Courses are organized into 3 parts – online video lectures, workshop and online exam. Each part will bring you closer to becoming a certified auditor or consultant for ISO 27001, ISO 9001 or ISO 14001 standards. These courses make it much easier for you to organize your time. You have unlimited

time to watch online video lectures, so you can do it at the tempo that best suits you.

The second step toward certification is attending the classroom workshop. Work- shops are delivered in a city near you, and you only one day in length. After getting all the theoretical and practical knowledge, you are ready to take the online exam. The exam is also done online, so you can schedule it any time you want.

Students' journey to the certification

In order to get the certificate, students have to go through the specially designed blended course with the following steps

 *Details about each step will be explained in the next pages*

01

WATCH ONLINE VIDEO LECTURES

Your journey starts with pre-recorded video lectures. This part of the course is completely free, you simply need to register on Advisera eTraining page and you can start your [Lead Auditor](#) and [Lead Implementer course](#).

Video lectures are organized into modules, where each module has several video lectures but also activities that will help you learn more quickly, as well as a practice exam that will prepare you for the type of questions you will get on the certification exam.

After finishing the online video lectures, you will have all the theoretical knowledge and you are ready for attending the workshop.

02

ATTEND THE WORKSHOP

The workshop is delivered in a classroom in a city near you. It lasts one day and, through this interactive session, you will gain practical knowledge about conducting certification audits or implementing an ISO standard. This is achieved with various case studies, role playing, etc.

At this point, you will already have all the theoretical knowledge, so the workshops teach you how to apply that knowledge through case studies and real-life examples. The workshop also includes preparation for the exam.

03

PASS THE ONLINE EXAM

Now that you have gained all the theoretical and practical knowledge, you are ready for the final step on your journey to the certification – the online certification exam.

The exam is done completely online, so you can take it from your home, or any other place convenient for you. There is also no time limit for you to take the exam after the workshop, so you can also choose the time that best suits you.
